- Explore a world of new screen templates, player themes, functionalities, and more...

Why RapideL?

RapideL's end-to-end, configurable and collaborative workflow, coupled with its cloud-based Software as a Service (SaaS) architecture, offers you a high level of flexibility and efficiency in developing rapid and cost-effective online training. From creating and customizing, to reviewing and publishing, and finally to packaging and delivering, RapideL guarantees two things across your entire online courseware development lifecycle – ease of use to put your mind at ease.

Create

Start anytime, access anywhere

It's all web-based and in the cloud, so you can access RapideL from anywhere. No installation or plugins required. All you need is a PC (or Mac) and an Internet connection to connect, collaborate and create your courses online. search for interesting or recent posts and updates.

Storyboard interactive courses with ease

No experience in rapid authoring? No problem! Instructionally-sound and predefined Word-simulated storyboard formats—coupled with a wide selection of templates, themes, and customizable workflows— provide your instructional designers and subject matter experts a familiar interface to make content designing as easy as working on a word processing application. share information and updates with their peers.

Don't just hope it works... make sure it does

Don't wait for the course to be published to iron out the chinks – preview as you go with the "What You See Is What You Get (WYSIWYG)" component-based authoring interface. Drag and place elements exactly the way you want your learners to see them, synchronise audio with page elements using the Timeline Editor, and then preview your design by page, topic, or course at the click of a button

Customize

Configure your course the way you want

As the course Owner, you can adjust settings to match your project requirements either at the start or at any point during development, including configuring the course player features, theme and navigation.

Make your course media-rich and beautiful

Speed up the development process using RapideL's ready-to-use player, theme and template galleries and make your course engaging using the media and interactivity libraries.

Don't ever lose your work or your time

Don't ever lose your work or your time Setup RapideL's powerful version control system to maintain backups of all pages that you create. If something goes wrong, simply roll-back to a previously-saved version at any time.

Collaborate

Author collaboratively with your team

Collaborate and work with your team on the same course. Assign "Author" roles so that team members can work simultaneously on the same project and collaboratively speed-up course creation.

Get your experts to review online

Assign Reviewer roles to your subject matter experts so that they can review the course with you, no matter where they are located geographically.

Share and reuse assets and resources

RapideL's single location repository allows all your project team members to share and reuse assets, resources, templates and galleries across courses and projects.

Compile

Package your course based on your needs
Depending on your requirements, package your course for web-based delivery (no compliance/ tracking available), or package it to comply with SCORM standards.

Publish in a format of your choice
RapideL supports both Flash and HTML5 output. Decide what devices you want to deploy your courseware, and then simply publish your course in the format that works best.

Manage your courseware and course assets
Use RapideL's single location repository to save and archive course assets and export course transcript to Excel or Word formats for future revisions and updates.

Return on Investment
Optimise effort, reduce cost, save time, fuel performance
The right rapid authoring tool is only right for you when it gets you the right results. With RapideL, our clients have got just that. Here's why...

- Collaborative, role-based review mechanism – reduces feedback efforts by up to 30%
- Multi-user WYSIWYG workflows – reduces development time by up to 40%
- Customizable settings, reusable assets – reduces development cost by up to 50%
- High-quality, interactive Flash or HTML5 course output – reduces time-to-market, increases deployment footprint, improves learning efficiency and fuels performance

Technology

RapideL is hosted in cloud environment that allows us the flexibility to scale up the infrastructure within hours. The advantages of Cloud hosting are rapid deployment, customization, flexible use, scalability, reliability and efficiency.
