

Yellow Platter

Learning Management System

YP LMS

A low cost, easily configurable, highly scalable and rapidly deployable LMS that is helping clients across the globe to accelerate learning and manage performance

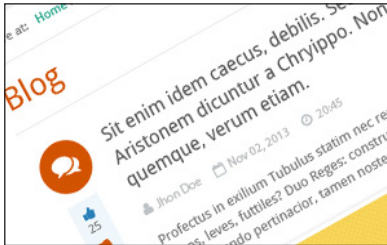

Overview

What do you look for in a learning management platform? An intuitive interface that is easy to use? A host of robust performance analytics and train-track-report capabilities? The ability to manage learning on the go, with various social learning features? Or a role-based access architecture that enhances data security? Well, why choose one, when you can take the whole lot, and more! Yellow Platter LMS (YP LMS), our multi-tenant, out-of-the-box, rapidly deployable Learning Management Platform offers you the right blend of traditional and innovative LMS features that you can customize to your requirements without burning a hole in your pocket in licensing and implementation costs. Built on current Microsoft technologies and SaaS architecture, YP LMS is the platform of choice if you're looking to provide a simple to use learning management system to your employees and customers to help them learn, collaborate, and perform!

Learning Collaboration

YP LMS is designed to be learner-centred, and aims to make the learning environment as collaborative and encouraging for the users as possible. Learning collaboration tools are just one of the many components that help learners to stay informed about current happenings, stay connected with their peers and collaborate with each other to enhance the learning experience.

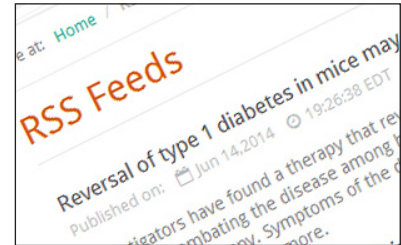

Blogs

Blogs can be posted by the Admin to communicate information or opinions about a topic. Learners can read the blog posts, post their comments and use the filter features to search for interesting or recent posts and updates.

Forum

Once an Admin has defined a forum category, users can post comments and queries, exchange ideas or views on a particular topic or generally share information and updates with their peers.

RSS

Feeds RSS Feeds are a great way for learners to stay informed about the latest news, blog posts and other online updates on subject that are of interest to them. To encourage 360 degree learning, the Admin may select stories of interest to the learners and make them available on the learner's home page RSS Feed pane.

Social Media collaboration

The latest YP LMS release integrates powerful Social Media communication and collaboration components. Now, users will be able to post their comments on popular platforms like Facebook, Twitter and LinkedIn and comment on posts by others in their learning community. They will also be able to share status updates about courses they have viewed, assessments they have passed or curriculums they have successfully completed, leading to a truly collaborative and social learning experience.

Tracking and Reporting

Management information system (MIS) and reporting is at the heart of any good Learning Management platform. YP LMS starts with a dozen standard report formats that one can customize as required.

- ◆ Use 15+ standard reports, with more customized reports using Reports Wizard
- ◆ Filter reports using multiple criteria and setup and run scheduled reports
- ◆ Custom reports on system health and usage
- ◆ Provision for error score card generation
- ◆ Export report data in HTML, Excel, PDF or CSV formats
- ◆ Single-click feature to print or email reports

eCatalogue

YP LMS ships with in-built support to create a commercial or non-commercial learning product catalogue. The eCatalogue module allows Admins to configure specific access rights and privileges so that users can:

- ◆ Receive log in or enrolment credentials based on defined rights and privileges
- ◆ Request LMS administrator to generate or reset access credentials
- ◆ Securely access LMS account to purchase learning products (for commercial product catalogue) or view assigned products (for non-commercial product catalogue)
- ◆ Receive certification on successful completion of training

User Experience

- ◆ UX is maximized with the self-service functionalities
- ◆ Well defined administrator functionalities to perform specific tasks in the system
- ◆ Ability to customize announcements and engage the learner with the platform
- ◆ Easy data access for reporting & audit
- ◆ Powerful search for System administrators which can be configured for the Learners
- ◆ Easy navigation & GUI for the Learners
- Branding and personalization
- Strong visual experience

Technology

The YP LMS Learning Management Platform is built on current Microsoft technologies and SaaS architecture.
